

# Order Form - “New Age Composter” Compost Bin From New England Plastics Corporation

Via Cornell Cooperative Extension of Rensselaer County

Here are the details:

Cornell Cooperative Extension of Rensselaer County is putting together a group order of compost bins. The bins will cost \$70.00 each which includes shipping to CCE in Troy, NY. Buyers will be responsible for picking up their bins at the CCE Office during normal business hours (M-F, 8:00 AM to 4:00 PM) or other designated site. You must pre-pay for your bin. The bin we are ordering has the following dimensions:

Height: 32”

Length” 129.5”

The bin is a long sheet of recycled plastic, you form it into a circle to make it free-standing

Diameters you can make the bin: 30”, 33”, 37”, 41”

Orders for a total of 20 bins will be accepted. Deadline: Thursday, April 30, 2015

See reverse of this page for more details.

# The New Age Composter

produces more compost, faster, with less effort

**Sturdy** - Constructed of thick, rugged recycled plastic.

**Color** - Green or black (Municipal programs - black only)

**Unique top and bottom cones virtually eliminate need for turning** - Bottom cone brings air into the center of the pile, speeding up aerobic activity, top cone holds in heat and moisture.

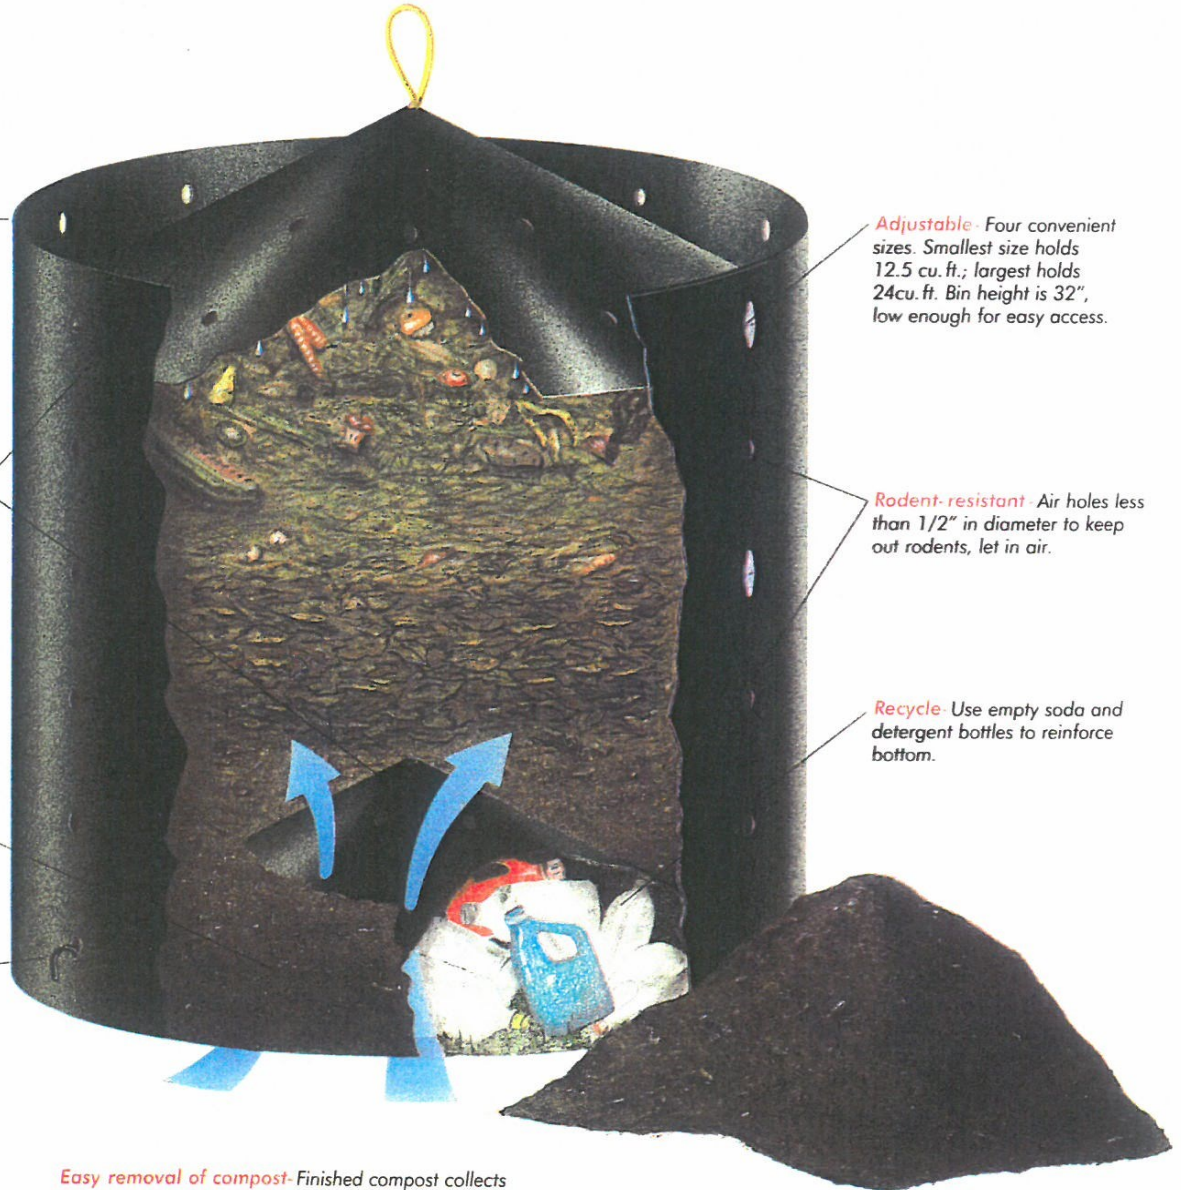

**Fast and efficient** - Produces finished compost in as little as 60 to 80 days.

**Secures to ground** - Metal stakes hold composter in place.

**Adjustable** - Four convenient sizes. Smallest size holds 12.5 cu. ft.; largest holds 24 cu. ft. Bin height is 32", low enough for easy access.

**Rodent-resistant** - Air holes less than 1/2" in diameter to keep out rodents, let in air.

**Recycle** - Use empty soda and detergent bottles to reinforce bottom.

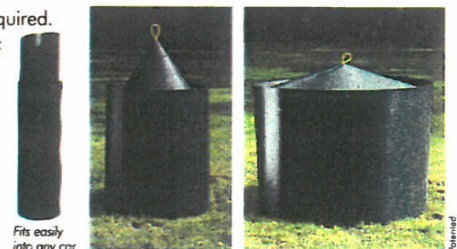

**Easy removal of compost** - Finished compost collects around the bottom cone where it can be removed as needed from above, or all at once by opening up the bin.
